**SOUTH AYRSHIRE HEALTH AND SOCIAL CARE PARTNERSHIP
INTEGRATION JOINT BOARD**

19th February 2020

Report by Director of Health & Social Care

CARING FOR AYRSHIRE PROGRAMME – FORMAL LAUNCH

1. PURPOSE OF REPORT

- 1.1 The purpose of this report is to advise members of IJB of the proposal to formally launch the Caring for Ayrshire Programme outlining the strategic ambition of the programme.

2. RECOMMENDATION

- 2.1 **It is recommended that the Integration Joint Board Members support the proposals to formally launch the aims and objectives of the Caring for Ayrshire programme.**

3. BACKGROUND INFORMATION

- 3.1 The Caring for Ayrshire Programmes 'Initiation' and 'Scoping' phases embedded several pieces of activity and work around defining Ayrshire and Arrans strategic vision around future models of health, care and wellbeing services.
- 3.2 During Q1/Q2 of 2019/20 we carried various levels out early pre-engagement activity, as part of the Caring for Ayrshire Conversation, collating initial views and insights around the needs of our citizens in support of future health and care services. Additionally, there has been internal engagement, gathering insights and views from our staff and workforce as well as collaborative involvement with our Health and Social Care Partnerships.
- 3.3 In parallel to this activity we have been working with Scottish Government around the approach and methodology in support of designing and developing a whole system redesign of health and care services to enable the delivery of this major transformation programme.

4. REPORT

- 4.1 Whilst every effort has been made in using the Caring for Ayrshire Programme branding, this has been carried out on informal basis with our stakeholders along with joint opportunities with our HSCPs.
- 4.2 As we now progress with the programme we are looking to carry out a formal launch, targeting commencing w/e 21st February 2020, in providing

widespread awareness of the strategic vision of the programme, along with models of care across Ayrshire and Arran.

- 4.3 This will enable more visibility of the programme, by conducting press releases, media campaign, wholesale marketing, the use of various communication methods/channels along with providing further sign posting to the programmes progress to date, relevant FAQ's and future plans. The launch of the programme will underpin and lay the foundations of a 6 week period of informing and engaging with our staff, citizens, users and stakeholders, using different methods and channels in communicating the future strategic vision of Ayrshire and Arrans health and care services.
- 4.4 In terms of supporting the launch of the programme, we aim to undertake a Public Relations approach, supported by the Medical Director, clinical leaders, social care leaders and representatives from the voluntary and third sector groups to showcase the programmes aims and ambitions. This will not only involve our staff and citizens, but also enable media and press to be involved and engaged on the strategic objectives of the programme, and the approach to delivering future health, care and wellbeing services.

5. STRATEGIC CONTEXT

- 5.1 The achievement of delivering new models of care provides better access to healthcare services and should therefore have a positive effect on the health inequalities priority within local LOIPs.

The achievement of implementing new models of care will have a positive contribution towards the Caring for Older People priority.

6. RESOURCE IMPLICATIONS

6.1 Financial Implications

- 6.1.1 All associated funding for a launch will be covered under the programmes budget allocation.

6.2 Human Resource Implications

- 6.2.1 None.

6.3 Legal Implications

- 6.3.1 None.

7. CONSULTATION AND PARTNERSHIP WORKING

- 7.1 This has been previously considered by the following groups as part of its development. The groups have either supported the content, or their feedback has informed the development of the content presented in this report.

- Caring for Ayrshire – Stakeholder Engagement and Insights Group, 23 January 2020
- Caring for Ayrshire Programme Board, 29 January 2020

8. RISK ASSESSMENT

- 8.1 By formally launching the strategic vision and ambitions in Ayrshire and Arran around our future health and care services, then there is a risk around managing expectations on delivery timescales. This is a major transformational programme of work over that 10 years and beyond, that will be complex by nature. Robust governance will be put in place along with following policy guidelines around capital investment which takes time to plan and implement. The aim will be to continue to hold briefing sessions with our MPs/MSPs, proactively engage with local press in advance and conduct extensive engagement across staff, partnerships and citizens in advance of any redesign and implementation of services.

9. EQUALITIES IMPLICATIONS

- 9.1 An impact assessment has been carried out more generally in relation to the entirety of the Informing and Engagement work that is equally relevant to the initial launch of the programme.

10. SUSTAINABILITY IMPLICATIONS

- 10.1 Detail Successful management of delivering our strategic vision of future models of care requires leadership, engagement with clinical staff as well as our citizens. The Health and Social Care Partnerships have increasing influence on shaping the delivery health and care services more locally, making them more person centred and sustainable in the future.
